

LegalVault Software Requirements Specification

Functional Requirements

FR-01

The system shall allow a user to upload a legal document.

FR-02

The system shall allow a user to assign a document title and category.

FR-03

The system shall store the uploaded document and its metadata.

FR-04

The system shall allow users to search documents by title or keyword.

FR-05

The system shall display document metadata when a document is selected.

FR-06

The system shall allow a user to download a stored document.

FR-07

The system shall allow a user to delete a document they own.

FR-08

The system shall distinguish between private documents and documents shared with authorized users.

Non-Functional Requirements

NFR-01

Document search should return results within 2 seconds for a collection of up to 5,000 documents under normal operating conditions.

NFR-02

Uploaded files must not be exposed to unauthorized users.

NFR-03

The system should preserve the original uploaded file without silently changing its contents.

NFR-04

The application should provide clear feedback when an upload fails.

Constraints

The initial version supports PDF documents only.

The system does not provide legal advice or determine legal outcomes.

Only authenticated users can access private documents.
